QuickGROW™

HOW QUICK GROW WORKS

Your scalp has around **80k - 150k** little follicles that produce hair through a process called **keratinization**. This process is a form of mitosis where one cell divides into two identical daughter cells, which then immediately dispels their nuclei causing the cells to die and harden.

Billions of these hard dead cells become tightly packed inside the follicle, forcing them to move up and out of the follicle and become visible to the naked eye as a strand of hair.

Our **Capsules** create an efficient, nutrient rich environment surrounding your follicles in your scalp by improving communication, blood circulation, removing blockages and free-radicals and increasing elasticity and collagen production in the skin.

Our **Shampoos and Conditioners** contain a proprietary herbal blend that supports and promotes keratinization, and by using our products direct on your scalp; you are delivering this biotin and amino rich formula (the building blocks of keratin) direct into your follicles for faster growing hair.

Our **Hair Shakes** deliver an abundance of vitamins, minerals and amino's that your hair, skin and nails love to support and enhance your overall hair growth speed and condition of your hair.

RESULT: We have achieved 3 times the normal growth speed when our full range is used together as frequently as possible.
